

# ISEC3002 Penetration Testing and Defence

## Workshop 12

Completing Workshops 1-11 and submit your solutions to Blackboard.

- Assessment 2 → Workshops Activities

This will need you to submit 11 solutions to workshops activities including Vulnhub and CyberRange challenges in separate pdf files. You need to include commands and screenshots in your solutions.

When you are taking screenshots of your steps you also need to have your name and student number in an open terminal window to prove that the screenshots are yours.

- For example, you can use the echo command to put your name and ID on a separate terminal.

The followings will strongly be recommended:

- Using Different approaches from what others suggested to hack the machines.
- Host your solutions to Vulnhubs/CyberRange challenges on your personal website.
- Upload your solutions to Vulnhubs challenges to Vulnhubs website.
- Demonstrate an adequate and consistent use of scholarly practice such as citations and references in correct APA format unit, cover page, table of contents, table of Figures, Table and Figure captions, including introduction and Conclusion section, correct grammar, and spelling.
